and some grain. The origin of the fire is unknown.

A considerable amount of necessary road work has been accomplished at Hillside and although it has been completed at a big chore it will be such a benefit that even this will be added to frost time to time by donation work. Our neighbor Mr. Levi Boucher has done a heap of draining and bridge work on his homestead and if anybody deserves a good high and dry road he does. It is somewhat hard to say which the settlers has done the most work, but I certainly must mention Mr. Petherston.

Hiram Burger is also making his home in out hills at present and doing some work on his land. We have a constant stream of settlers and home seekers passing through these parts, all seem well pleased with the country they find east of this although they have to quite a distance now to get homesteads.

Mr. John Gray who has not been well for some time started on Friday last for Oregon where she intends to spend a few months. We hope the change will do her good.

It is only natural that sensational notes should be sent to correspondents from time to time to baffle them to send in for insertion, but usually writers to newspapers inquire a bit before they launch forth or at any rate matter in which he lurks. See Jones, why your item is off?

Hillside Park.

We have now had some nice rains and things are looking exceedingly well.

Mr. and Mrs. Gus Backstrom are the proud parents of a son since last week; our population is given.

Work on the roads have now commenced and they will be improved considerably this year, which will be a good thing for everybody.

Tony Ward was here from Lewisville, looking around for a hired girl last Tuesday.

Messrs Carlson and Johnson of this place and Anderson Bros. and Oberz, of Edinville, went to Pigeon Lake to take in the drive.

Ponters Johnson of Lewisville, is out here fencing his homestead and building a house. What next?

Messrs Lien and Djuve, of Edinburg, were here on business last week.

E. W. Nordgren drove a party of log drivers to Pigeon Lake last Tuesday and Wednesday.

Messrs Hanson, Borglum and Klinuski drove to Wetaskiwin on business last week.

E. A. Hanson has his store almost finished and will soon move into it, with more room he will be able to accomodate the settlers better before than before.

Our Smoky Hollow friend seems to have been hit on a soft spot, which we sincerely regret, as to finding S. H. in the geography we left him when he was taken up as bad as job as it is out of sight.

The roads are again soft and beautiful and the dust is rather wet.

The absence of the "skeeters" make fencing and ditching quite agreeable jobs.

Mr. Flyote of Michigan is in the district looking for land. He is well satisfied with the prospects.

Some of the grangers are kicking at the way the mails are handled, sometimes mails are several weeks late.

Fred Wagner was in the city on business a week ago. He intends going East shortly.

Evaporated Milk

What may prove to be one of the most important of modern discoveries is a process of drying milk, by which the moisture is evaporated, leaving all the nourishing and substantial elements unaffected. This, it is claimed, has been accomplished. The exact proportion are the seven, that is to say, one tablespoonful of power to seven parts water gives milk as though it had just come from the cow. There is stated to be no loss or deterioration by keeping or transit. The process is perfected, and supplies are about to be placed on the market. The discoverer is certain that he has found an invaluable adjunct for military, naval and colonial supply, which he claims that his power affords an absolute guarantee for the proper nourishment of children.

Good Vs. Common Steers

The feeders who market the best steers realize that the best class of feeders make the best cattle on the market, being the "most money" and year in and year out make the most profit. There is a much greater demand for good kinds than the common grades and the supply much more limited.

One of the experiment station has been doing considerable work in experimenting with the different grades of cattle, and as a result have drawn --

More rapid and much larger gains may be secured on the better than on the more common grades.

The better the grade of cattle the higher the percentage of dressed beef.

Low grade cattle carry larger percentages of internal fat than the better breed ones, while there appears to be a more abundant and more evenly distributed layer of surface fat on the better breed steers.

Both the market and slaughter tests of the various grades as finished clearly indicate that to the packer and butcher condition is of first importance.

The greater the spread in the market between the various grades of feeders, the more is the advantage in favor of the commoner grades.

A concentrated grain and shorter feeding period tend to favor the feed-

ing of the lower grades.

The greater the spread in the market between the various grades of feeders, the more is the advantage in favor of the better grades.

Opportunities for larger profits, and losses as well, lie with the better grades of feeders.

Steers containing high percentages of beef blood possess greater capacity for consuming large quantities of feed than steers of a more common grades, especially in the later weeks.

Possibly cattle of heavy weight can be finished profitably on a narrower margin than can light weight feeders.

Feeding cattle which require an extended period for finishing require a larger margin than do feeders which can be matured in a shorter time.

Ferry Point

John Kinch is enjoying a visit from his father of Milbank, S. D.

A brand new boy at R. V. Campbell's, this accounts for the big smile "Vic" wears.

One of Rev. J. M. Wilkin's driving horses was severely cut in a wire fence last Saturday.

A surprise party was tendered Mrs. Henry Liebling on her birthday, May 31st.

Mr. Scott's barn was burned about a week ago. The cause of the fire was unknown. Mr. Scott's neighbors assisted him in building a sod barn.

Rev. Stavney has secured a homestead and will build upon it soon.

Mrs. Henry Cunningham of Milbank S. D. arrived last Saturday on a two months' visit to her son W. R. Cunningham and other relatives and friends.

The Ferry Point road district elected officers last week. The district comprises ranges 17, 18 and 19, tp. 44, and ranges 17 and 18, tp. 43, all north and east of Battle River and Dried Meat Lake. The councilmen are Mr. Knolko for division one; R. V. Campbell for division one; and Geo. W. Sawyer for division three.

Smoky Hollow

Seedling is past and people say that we need rain, no doubt, we will have plenty after a while.

No doubt one of the chief carding cards for the annual Little Beaver picnic will be the quill pusher from that district pushing a wheel barrow down hill. People say he has not enough energy to push one up hill.

Geo. Sinke has returned to the Hollow and intends to improve his homestead.

The Premier School District will soon have the prettiest school grounds in the country.

E. Do. Fraim accompanied a party of land seekers out East last week.

Say! The L. B. Scribe is getting funny. He should be travelling with a comic opera troupe. We would predict for him a glorious success. Provost there was no rotten hen fruit around.

A number from here took in the sale at H. Ounn's last week and report that cattle sold cheap.

Ramsey and Friends are breeding well for A. Peterson.

L. Hanna and W. Binnings, past through the Hollow last week.

Holt wheeled from town last week and made good time.

The Greatest Family Remedy

And one well known in most Canadian homes for all internal and external pain.

Mrs. M. E. Cartwright of Morris and her husband are now living out here in Nerville. When I get toothache Nerville stops it. If I get sick headache, cold or rheumatism, Nerville cures me promptly. To break up a cold or rheumy on Nerville I put a piece of Nerville on my head or between my eyes and rub it on my forehead.
